Interests

Angiosperm evolution, macroevolution, plant breeding systems, evolution outreach, biology education research

Education

PhD in Ecology and Evolutionary Biology

University of Illinois at Chicago

Thesis: The Process of Natural Selection: Resultant Patterns and How We Understand Them

MA in Molecular and Cellular Biology

Hunter College of the City University of New York

BS in Forensic Molecular Biology, Philosophy John Jay College of the City University of New York

Teaching Experience

2016-2017 BIOS120: Biology of Populations and Communities

Introductory biology laboratory course

2017-2018 BIOS430: Evolution

Upper-division

Summer 2018 BIOS220: Molecular and Mendelian Genetics

Upper-division

Professional Experience

2018-Present

Nurturing Wisdom Tutoring

Introductory biology laboratory course

Extracurricular
